

Online PDF<https://www.genconnexdirect.net/litature.htm>**Tools Needed**#2 Phillips head screwdriver
#10mm box end wrench
flat head screwdriver
10mm socket
Safety goggles**Step 1a - Remove fuel pump cover & left side door**

1a-1 Remove #10mm side bolt holding corner cover on

1a-2 /3 Pull back rubber gasket and remove 2 #10mm nuts then pull up and remove corner cover.

1a-4 Lift off door to gain access to air cleaner side of generator (left side when looking at front)

Step 1b - Disconnect internal connections to gas module assembly1b-1/2 Remove propane fuel tube clamp then separate propane fuel line from propane injector just above air box. **Install supplied stopper** into end of brass fuel injector twisting to make sure it seals hole in end.

1b-3 pull off vent hoses from brass nipple of internal regulator suspended from inside of lid.

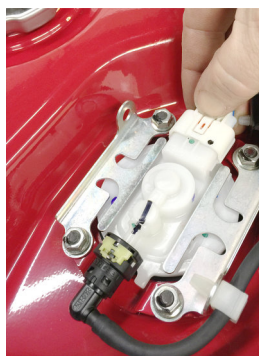

1b-4 Unfasten ground strap from internal regulator by removing existing #10mm ground bolt, and re-installing with just black ground wires under bolt head and tightening down.

Step 1c - Remove propane top cover and install gasoline tank

1c-1 Remove 4 corner #10 hex bolts.

1c-2 Lift off entire red cover up from the back then slide out back. **NOTE** the orientation of the black large tank gasket then remove and place on gasoline tank in same orientation. Take your time with this - its important to get this gasket fully on.1c-3 Install gasoline tank at angle and push forward. Use a star screwdriver to help align 4 corner holes with frame. **NOTE** make sure gasket is completely installed or this step will fail.**Step 1d - Make connections to gasoline tank**

1d-1/2 Reconnect gas line and pump electrical connector after tightening down tank 4 #10 bolts. Note tank and quick disconnect gasoline hose may have red stoppers pushed on/in them to prevent spillage. Remove and discard if so.

1d-2 Reconnect gas tank vent tube from underneath side of gas tank. **DO NOT SKIP THIS STEP**

1d-3 Reconnect gasoline fuel injector electrical connector. This cable is folded in behind throttle body. Reinstall side door.
